SELECTED PROJECTS

Cadence: governed agent delivery (2026) · Architect + sole author
46/48 · Tests locked before code, a default-reject verifier, budgets and human gates. ~$737.
https://www.keshav-raj.com/work/cadence

Self-updating architecture wiki (2026) · Designer + owner
103 PAGES · Built from ~1,030 session notes across 22 repos.
https://www.keshav-raj.com/work/arch-wiki

AI dev architecture (2026) · Architect
CONTRACTS · Skills, contracts and OpenSpec that agents build against.
https://www.keshav-raj.com/work/ai-dev-architecture

App Tower: fleet control plane (2026) · Product owner + tech lead + architect
10 DAYS · Builds, staged Play rollouts and crash-free monitoring for ~660 white-label apps. 2,228 specs, 0 failing.
https://www.keshav-raj.com/work/app-tower

Self-hosted OTA updates (2026) · Architect + sole implementer
4 DAYS · KMS-signed updates, default-on for every school; rollback reaches devices in ~2 min.
https://www.keshav-raj.com/work/ota

Events ingest hardening (2026) · Primary engineer
6–9.5M/DAY · Ops dashboard, dead-letter queues and a 1,944-case compatibility gate with 0 diffs.
https://www.keshav-raj.com/work/events-ingest

Bodhi learner platform (2024 ’ now) · Founder + architect
13 SERVICES · Runtime micro-frontend platform shared by web, school sites, live class and mobile.
https://www.keshav-raj.com/work/bodhi

Headless player SDK (2026) · Architect + sole author
98% MUTATION · FSM core with DRM providers; now the default player. 198/198 tests.
https://www.keshav-raj.com/work/player-sdk

ProductEventHub (2026) · Designer + primary author
200K/DAY · Typed producers, one durable outbox: ~200k auth failures a day eliminated.
https://www.keshav-raj.com/work/event-hub

CAREER

2019–2020 · Engineer. Joined a white-label learning platform and became the main builder of its new React Native + Next.js learner app.
Designed the web test player: one logic layer, a template per exam; Led the merge of mobile into the shared codebase; First admin feature: offline quiz & essay grader.

2021–2022 · Senior engineer. Moved from features to the layers everything else depends on.
Shared API cache for web + mobile; Mock-test questions served from the CDN; RN performance pass: cold start 8 s ’ 1 s

2023–2025 · Senior engineer / code owner. Became the person most code passed through, then started the next platform.
Merged 57–69% of all learner-app PRs; ~600 reviews; Client analytics pipeline at 100M records/day; Founded the next-generation learner platform (2024).

2026 · Lead / Staff. Platform, fleet and security work across many repos at once, increasingly delivered with AI agents.
Fleet control plane for ~660 apps; self-hosted OTA; Mobile builds 45 ’ 7 min; anti-piracy detect-then-enforce; Cadence: governed multi-agent delivery.

SKILLS

REACT NATIVE	RN 0.63’0.81, Hermes, MMKV, FlashList, native modules
WEB / NEXT.JS	App Router, React 19, SSR, micro-frontends
PLATFORM & CI/CD	GCP, GKE, Cloud Build, VM runners, release consoles
SECURITY & DRM	Widevine / PlayReady / FairPlay, device-bound tokens, signing
AI AGENTS	Claude / Codex agents, verifiers, budgets, human gates
DATA & ANALYTICS	Event pipelines, StarRocks, BigQuery, durable outboxes
PRODUCT & SPECS	Specs, user stories, API contracts, metrics design
LEADERSHIP	Sprint governance, reviews, audits, roadmaps
